

Modules	Concepts
1. Introduction & Setup	Mac versions – Features
	iOS versions – Features
	IDE – XCODE, Interface Builder
	Introduction to Xcode tool and Compilers
	Creating and building simple applications
2. Fundamentals of Swift	Classes and Methods
	Properties and Methods
	Arrays, Dictionaries – (Mutable)
	Categories and Protocols
	Application Lifecycle
	Xib, StoryBoard, and Interface Builder
	About MVC: Model, View, and Controller Classes
3. Basic UI Components	Button, Label, Text Fields, SearchBar
	Switch, Slider, Progress Bar
	Alerts, Action Sheet
	UITableView, CollectionView
	ScrollView, WebView
	Picker, Date Picker, UIImageView, Image Picker Controller
	Gesture Recognizers
4. Intermediate UI & Navigation	UIViewController Lifecycle
	Custom UI Components (CustomCell, Custom Font)
	Image Asset, Color Asset Management
	View-to-View (Present model view controller)
	Navigation Controller, Tab Bar Controller, PageView Controller
5. Advanced UI Concepts	UIKit and View Lifecycle
	Alpha, Opaque, Hidden
	SplashView and Basic Animation
	Adding Views with Animation
	Lottie Animation
6. Data Management	User Defaults
	Plist
	SQLite
	Core Data
7. Multimedia Integration	AVAudio Player
	Media Player
	MPMovie Player
8. Working with APIs and Services	REST Services
	JSON Parsing
	Error Handling
9. Maps & Location	Introduction to MapKit Framework

	Showing a Simple Map
	Update User Location
10. Notifications	Local Notifications
	APN and Firebase Notification
	VOIP Notification
11. Social Media Integration	Facebook Integration
	Firebase Mobile Login
	Apple Sign-In
12. Multitasking and Performance	Synchronous and Asynchronous Operations
	Introduction to NSTimers
13. Testing & Deployment	Developer ID Creation
	Debugging Application on Device
	App Store Submission
14. Additional Concepts	Delegate and Data Source
	Pod File Integration
	UIState Preservation
	View Application Sandbox and CrashLogs of Application

TOPICS	TRAINERS
1. Introduction & Setup	Naveen
2. Fundamentals of Swift	Esakki
3. Basic UI Components	Harish
4. Intermediate UI & Navigation	Harish
5. Advanced UI Concepts	Harish
6. Data Management	Rakesh
7. Multimedia Integration	Esakki
8. Working with APIs and Services	Munish
9. Maps & Location	Rakesh
10. Notifications	Naveen
11. Social Media Integration	Suriya
12. Multitasking and Performance	Munish
13. Testing & Deployment	Rakesh
14. Additional Concepts	Munish, Suriya
