

This page action is not working.
Also, if this works what is the expected action?

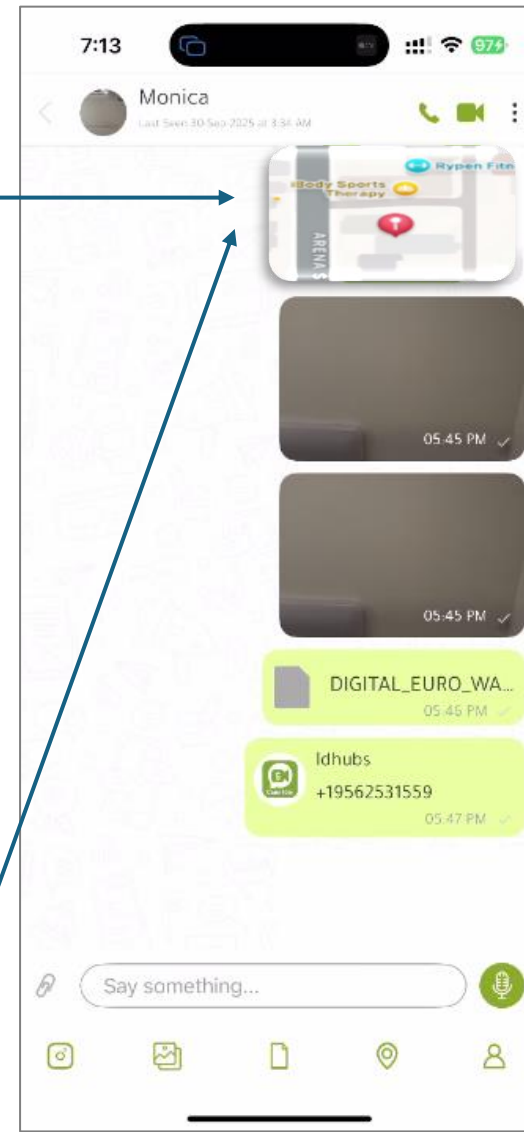

If you can make it logout instead of delete would be good.

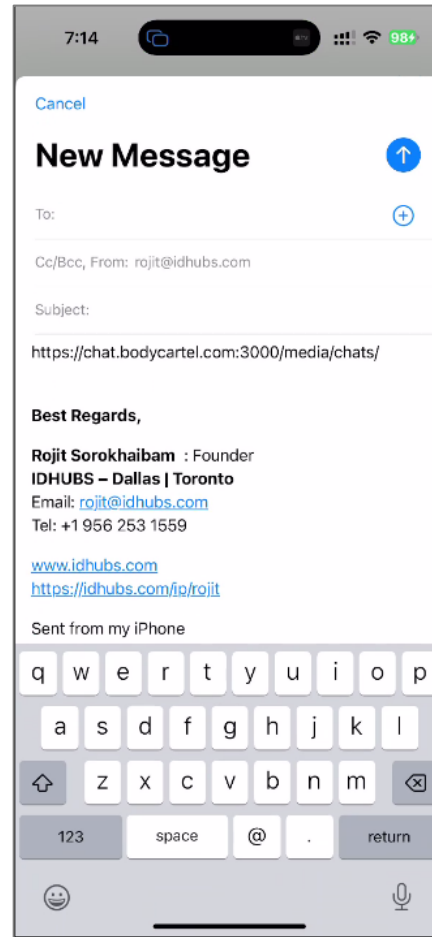

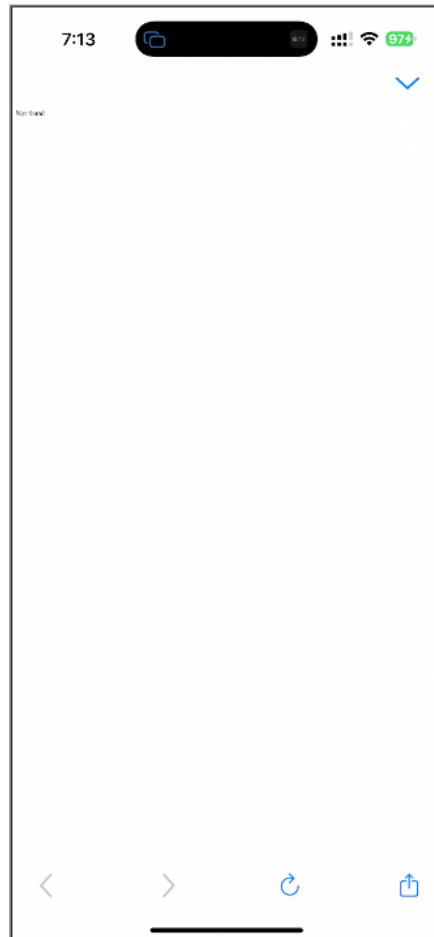

When I share a contact, I don't know why the Bodycartel fav icon logo is visible here. Instead, it has to be the contact person image which is at the phone contact list.

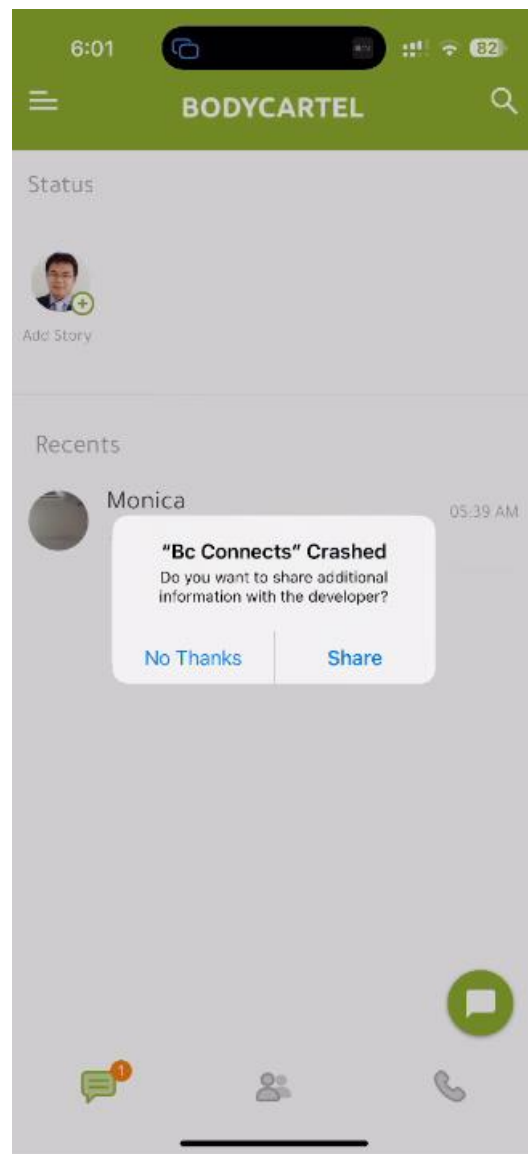

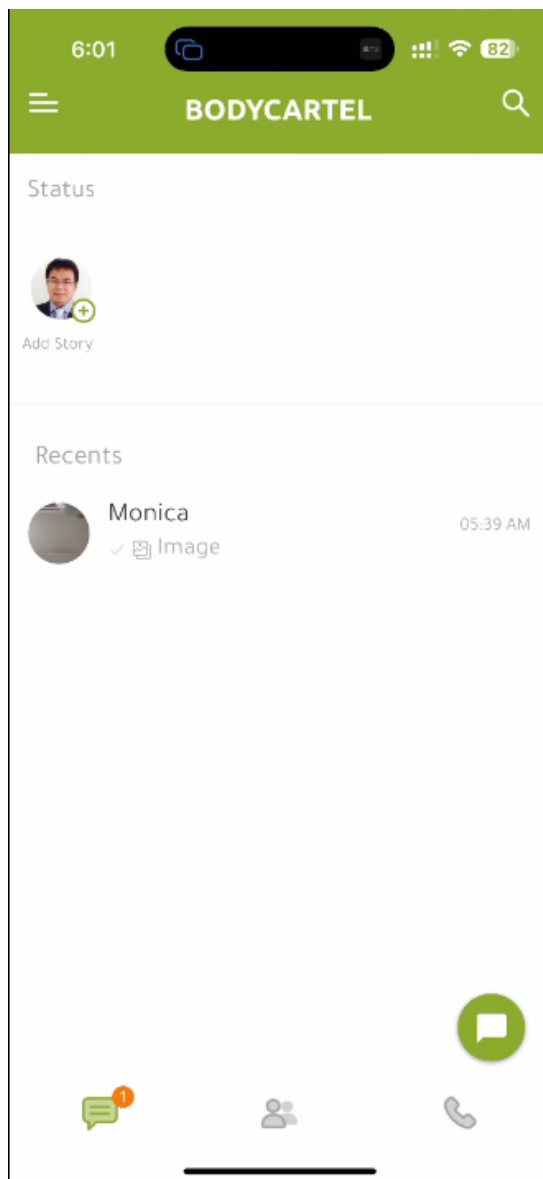

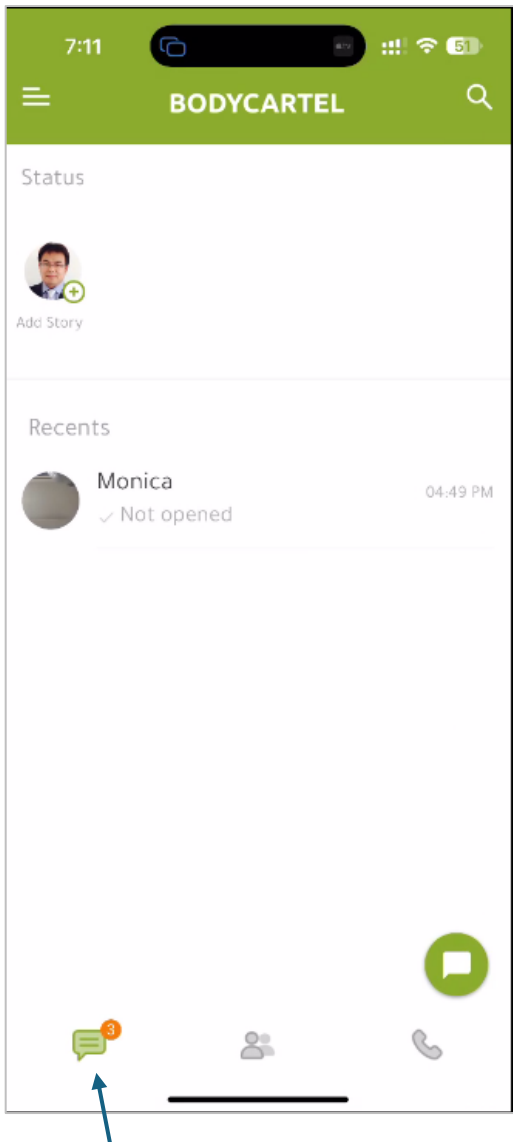

When the location is shared, you are displaying the fav icon of the Bodycartel. It should be a map preview instead.

When you capture a live camera or share an image or video. While during the sharing and uploading it should say uploading or place a gif loading icon. It is confusing to the user as it is not known that the image/video was successfully uploaded or not? Also. Let us restrict the file size of the upload to 15 MB for now.

This is an incoming message alert from someone. However, I can't open this message.
